Please find below and/or attached an Office communication concerning this application or proceeding.

RECEIVED TOUS

		Application No.	Applicant(s)		
		10/705,656	POTTER, MICHAEL D.		
	Office Action Summary	Examiner	Art Unit		
		Tamai I.E. Karl	2834		
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
Status					
1) 又	Responsive to communication(s) filed on 23	November 2005.			
		is action is non-final.			
	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is				
	closed in accordance with the practice under				
Disposition of Claims					
4)🖂	Claim(s) <u>1-6,8-16 and 18-24</u> is/are pending in	n the application.			
	4a) Of the above claim(s) is/are withdr				
5)	Claim(s) is/are allowed.				
6)🛛	Claim(s) <u>1-6,8-16 and 18-24</u> is/are rejected.				
	7) Claim(s) is/are objected to.				
8) Claim(s) are subject to restriction and/or election requirement.					
Application Papers					
9) The specification is objected to by the Examiner.					
10)⊠ The drawing(s) filed on <u>15 April 2004</u> is/are: a)⊠ accepted or b)□ objected to by the Examiner.					
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).					
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).					
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.					
Priority under 35 U.S.C. § 119					
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 					
2. Certified copies of the priority documents have been received in Application No					
3. Copies of the certified copies of the priority documents have been received in this National Stage					
application from the International Bureau (PCT Rule 17.2(a)).					
* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 2834

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 8-11, 18-21, 23, and 24 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Iwamatsu (JP 02-219478). Iwamatsu teaches a power system with a rotor having non-conductive section, (four sections : two monopole + and two monopole -, in figure 1) which rotate on a shaft between parallel electrodes 2 to generate a DC power when the section is closer to the lower electrode and when the + section is closer the upper electrode in figure 1. The negative charge section inherently having electrons. It is inherent that the generator is connected to a load.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 2-4, 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Iwamatsu (JP 02-219478), in further view of Ito et al. (Ito)(JP 08-308258). Iwamatsu teaches every aspect of the invention except the propeller/turbine mechanical

Art Unit: 2834

energy converter to rotate the shaft. Ito teaches a propeller/turbine rotating the rotor to generate electricity in a waterflow. It would have been obvious to a person of ordinary skill in the art at the time of the invention to construct the generator of Iwamatsu with the propeller/turbine of Ito to generate electricity from the flow of water.

- 5. Claims 5, 6, 15, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Iwamatsu (JP 02-219478) and Spence (US 3,786,495). Iwamatsu teaches every aspect of the invention except a charge being at the junction of two insulating layers. Spence Teaches an electrostatic charge being stored being insulating layers 14 and 16, of silicon oxide and silicon nitride. It would have been obvious to a person of ordinary skill in the ad to construct the electrostatic generator of Iwamatsu with the insulating layers of Spence to create a large charge density.
- 6. Claim 22 is rejected under 35 U.S.C. 103(a) as being unpatentable over Iwamatsu (JP 02-219478) and Wahlstrom (US 4126822). Iwamatsu teaches every aspect of the invention except storing the outputted potential. Wahlstom teaches electrostatic generators are used to store/recharge watch batteries. It would have been obvious to a person of ordinary skill in the ad to construct the electrostatic generator of Iwamatsu with the battery of Wahlstrom to prolong the life a device with a battery.

Art Unit: 2834

Response to Arguments

7. Applicant's arguments with respect to claims 27-58 have been considered but are not persuasive. Applicant's argument that Iwamatsu teaches dipoles is not persuasive because the section are monopoles while the rotor is dipole, and therefore reads on applicant's claimed invention.

Conclusion

8. Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Art Unit: 2834

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl I.E. Tamai whose telephone number is (571) 272 - 2036.

The examiner can be normally contacted on Monday through Friday from 8:00 am to 4:00 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Darren Schuberg, can be reached at (571) 272 - 2044. The facsimile number for the Group is (703) 872 - 9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
